

Unit 3. Searching and Selecting Information

Summary

This unit focuses on the use of **web search engines** and their **filtering tools** to select and interpret digital information, ensuring the accuracy of sources.

Students will learn about **intellectual property and copyright**, as well as how to detect **fake news**, rumors, and hate speech, understanding their **social implications**.

Evaluation criteria include the ability to search for and critically analyze information, recognize the influence of fake news, identify hate speech, and the strategies for spreading content online. Additionally, it covers managing the learning environment and creating digital content while respecting copyright.
